ITS EASY TO UNFOLD AN ANSFOLD

Caravans frequently try their hardest to wander away from Jugganauts, giving the impression that they really do not want to know them.

Tents have a very unhappy knack of getting wet when it rains and remaining so.

However the happy ANSFOLD neither gives that nasty wet feeling or the sensation that it does not want to mix with others on the road.

Elephants may not like mice, but Jugganauts really don't mind ANSFOLDS.

When high north winds blow Tents and Caravans over, they simply curl their way around and over the ANSFOLD.

The ANSFOLD is Light/Robust/Compact/Smart and Practical. It can be erected in one minute by one person - Folded down in one minute and ready for the road.

The ANSFOLD is a folding caravan constructed throughout of reinforced glass fibre.

ERECTING THE ANSFOLD IS JUST AS SIMPLE AS IT LOOKS

- 1) Here is the trailer.
- 2) Lift rear end of roof with left hand and pull out rear wall with right. Snap smartly together at the top.
- 3) Lift front end of roof with left hand and pull out front wall with right. Snap smartly together at the top.
- 4) Pull out offside wall.
- 5) Wall fits snugly into position
- 6) Pull out near side wall.

The photographs illustrate just how easily the caravan is erected. Spring catches, clips and straps ensure total rigidity and the caravan has been thoroughly tested in gale-force winds.

Reinforced glass fibre body is mounted on a steel chassis. It is designed on modern flowing lines - pleasing to look at either erected as a caravan or folded as a trailer.

The use of glass fibre for its main construction ensures strength with lightness in weight, minimum maintenance and complete resistance to rot, rust, worm, and other common forms of decay - in brief, an ANS-

FOLD can be your friend for life.

Internally, the ANSFOLD gives 6' 2" headroom and over 30 cubic feet of stowage, all of which remains undisturbed when either erecting or folding.

The ANSFOLD takes the fatigue and worry out of towing and ensures speed (tested at over 80 m.p.h.) with safety. Its unobstructed rear vision has great advantages on Motorways and winding mountain roads alike.

On continental and other overseas trips the ANSFOLD shows a considerable saving in freight charges.

Enjoy all the advantages of unobstructed rear vision when towing.

THEN THERES COMFORT & CONVENIENCE

COOKING AND WASHING

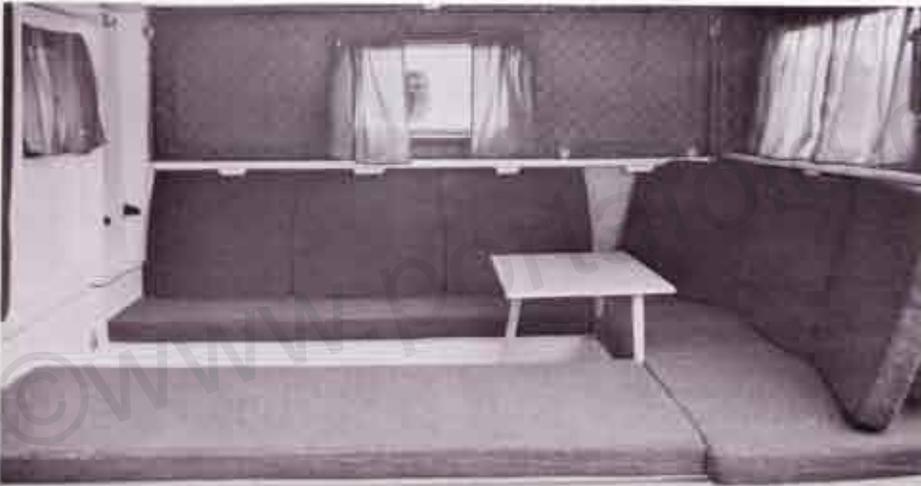

On these occasions the Ansfold competes admirably with all other types of caravan. The corner sink-unit is coupled to flexible piping for both waste water and gas, allowing it to be folded neatly away into its own locker.

With the cooker in its locker, cushions can be rearranged giving a large seating area, and therefore more comfort.

LOUNGING

The crowd has moved in with room for more. The caravan is very comfortable even on these occasions, and the cushioned seating completes the very relaxed atmosphere created inside this very versatile caravan with attractively coloured curtains and seat covering material.

The photograph shows the use of extra cushions.

TEA TIME

The heat resistant table top is fitted with three screw on legs and positioned to give very convenient facilities for eating. Longer tables can be purchased if required by the customer.

SLEEPING

Other arrangements are possible depending on individual requirements. An additional upper berth could be used if required.

The ANSFOLD sleeps either four adults in single berths or three adults (one double and one single) and two children (singles).

The photographs illustrate a few of the exciting interior arrangements that are possible. Many other layouts will come to mind depending on individual requirements.
